**Buxton and Hollis Agricultural Fair.**

The ninth exhibition of the Buxton and Hollis Agricultural Society opened Wednesday morning. The day was a sample of perfection and glory of Indian summer—early gave assurance of the most interesting of any fair, a big crowd, full of interest. The successful career of this season which in tributary embraces Hollis, Buxton, Waterboro and Dayton, now ranks with county fairs in Maine, is phenomenal, and those who know the nurturing and self-sustaining industry of those who have been the argument. Two years ago the society was an incorporated stock company and increased property has shown the widest that act. The present officers are:

The management have built since the exhibition a new trotting park, enclosed with a high and substantial fence, inside of which the entire out-door exhibition is held.

The programme of the three days' exhibition is as follows:

Wednesday—Exhibition of meat cattle, sheep, poultry, &c., town teams and draft horses.

Thursday—Display of stallions, team-matched horses, &c., bicycle race, trial of oxen.

Friday—Trotting on the society's new Standard-bred horses.

Portland, Me.

The London Times thinks Cleveland will be elected. The wish is evidently father to the thought.

Cleveland says he has heard enough about the tariff. It makes him tired. It had the same effect on Hancock.

Mr. Tilden will start for the West Indies shortly to be absent six months. Cleveland then is not going to get even the assistance of the Greystone state's vote.

Ex-Senator David Davis of Illinois declares for the Republican nominees.

In speaking of the ticket, he says: "I am firmly convinced it will prevail. I will vote the ticket and heartily support it. It is necessary for this Government that the Republican ticket be elected this year."

The fusion arrangement between the Michigan Democrats and Greenbackers is breaking down. The Straight Greenbackers are unwilling to hitch up with the Democrats even to accommodate Butler and have accordingly held a convention and nominated a straight Greenback electoral ticket.

The Springfield Republican remarks in regard to the forged letter from Neal Dow that though it was not written by him it embodies his sentiments and the facts. Therein the Republican differs widely from Mr. Dow, who denies that it embodies either. And Gen. Dow is undoubtedly much better informed on both these points than the Republican possibly can be.

At the meeting of the Boston Congressionalists on Monday two hundred men were present and the time was

almost wholly in political discussion. A sentiment was overwhelmingly in favor of Blaine. Rev. Dr. Thayer, a abolitionist of long standing, said that a vote for St. John was more than thrown away. It was in effect direct assistance to the Democratic party.

Springer's committee thinks the public service will be much improved when the practice of appointing men to office on account of their partisan service is done away with.

That idea occurred to the Republicans many years ago, and they have been endeavoring to reduce it to practice. To a certain extent they have succeeded. But at every step of their progress in that direction they have been resisted by Democrats. The Pendleton bill which was designed to accomplish in part at least the very thing which Mr. Springer now thinks the first essential to the purification of the public service was related as every step by the party of which Mr. Springer is a distinguished member.

All that has been accomplished in the way of legislation in the direction of taking the offices out of politics has been accomplished by the Republicans against the resistance of almost the entire Democratic party. If Mr. Springer's conclusion quoted above is an indication that the Democratic party has begun to see merit in civil service reform it is a good omen.

The reports of the Springer committee on the Star route prosecutions and the expenditures in the department of justice are Democratic campaign documents, nothing more, nothing less. They are signed only by Democrats, and they were prepared simply with a view to their effect on the Presidential election. The committee were instructed to report the facts which they ascertained together with suggestions in regard to legislation, if any were needed, to the House of Representatives at the next session of Congress. Instead of doing this, they have, or the Democratic members of the committee have, issued long in advance of the meeting of Congress a partisan document containing a few facts and a host of unwarranted assumptions and inferences. The reports have not been prepared in the interest of truth or of justice. They have been composed with an eye single to the effect they might produce in the Presidential contest, and are entitled to no more consideration than would be given to any ordinary Democratic campaign document.

Gov. St. John in his letter accepting the nomination of the Republican party gives utterance to many sentiments, the importance of which no considerable body of citizens of the Republic will undertake to deny. It is true that the moral elevation of the people is a matter of the highest importance. It is true also that the vice of intemperance is one of the greatest hindrances existing in the way of such moral elevation. It is true that morality, sobriety and efficiency, and not partisan service, should be made the test in the selection of public officials. But the practical question arises: Will any of these desirable things be promoted in the least degree by voting the Prohibition ticket? We confess to be at a loss to see how such an act will conduce to such a result. In the State of Ohio there are three parties in the field, the Republican, the Democratic and the Prohibition, each with separate candidates. We have the authority of Democratic and Independent journals for saying that the Democratic party is to make the fight as much as possible on the liquor question, and we have the same authority for saying that in this contest all the liquor interest will identify itself with the Democratic party. Now there is nobody so guileless as to suppose that the liquor men would be found solid for the Democratic ticket, contributing their money and influence to secure its success, unless they had received certain pledges of substantial value to their business, which is rum-selling, from the Democrats, that they have not been able to get from the Republican party. What they are, whether the same ones made to them last year and only partially fulfilled, or new and perhaps even more valuable ones, we do not know. But that the rum-sellers' adhesion to the Democratic ticket has been brought about by pledges of some sort there is no doubt. There are two ways of assisting to put the Democratic party in a position to be able to

redeem these pledges. One is by voting the Democratic ticket, and the other is by voting the Prohibition ticket, and either one of these methods is about as effectual as the other. On the other hand the only way to prevent the Democratic party from having an opportunity to redeem these pledges is to vote the Republican ticket. The practical effect of any other course, whatever may be the intention of the voter, is to commit the moral elevation of the people of Ohio to the saloon keepers and rum-sellers of that commonwealth. And what is true in Ohio is likely to be true in every Western State. In several of them already a close alliance has been formed between the rum-sellers and the Democratic party and in nearly all, if not in every one, negotiations looking to such an alliance are going on.

Useful Information.

[From the New York Sun.]

The New Haven Evening Register, a Democratic newspaper, which is manifestly struggling under the Cleveland influence, expressed the opinion the other day that the tariff question is the one business of the executive officer of this country. That is, in effect, just what Mr. Cleveland said in his letter accepting the nomination. This statement is a temporary now appears for help in its effort to master the principles of our system of government.

"We cannot resist the temptation we feel to ask that the tariff question be left to the representatives of the United States in the hands of the executive officer of this country. That is, in effect, just what Mr. Cleveland said in his letter accepting the nomination. This statement is a temporary now appears for help in its effort to master the principles of our system of government."

You will find it all in the constitution of the United States, a copy of which may be obtained from any good library. The executive power is vested in the President, but his functions are not limited to the execution of the laws framed by Congress. He is a part of the law-making power. Tariff bills and all other bills must pass through his hands before they can become laws. His responsibility for the enactment of a tariff law is as direct as that of Congress, unless the bill happens to be passed over his veto. Furthermore, the constitution requires that the President shall attend to the legislative wants of the country. He has the initiative in this respect. "He shall," says the Constitution, "from time to time, give to the Congress information of the state of the Union, and recommend to them such measures as he may deem necessary and expedient." He may even convene both houses of Congress in extra session, to make laws which he suggests and recommends, and which take effect by virtue of his approval and signature. The Evening Register has labored under an entirely false conception of the duties of the President. This is due very likely to the fact that, instead of hunting up a copy of the Constitution, it has derived its ideas from the published writings of Mr. Grover Cleveland.

FINANCIAL AND COMMERCIAL.

Review of Portland Wholesale Market.

FOR THE WEEK ENDING OCT. 1.

Some of our leading wholesale grocers report for their improvement in the volume of trade.

For the past month a very satisfactory business has been done. The market for flour is steady.

and prices are firm and more doing. Some of the Western mills have advanced their prices of winter wheat flour.

Sugar have raised their prices 1/2 cent. per pound; prices are 1/2 cent. lower than quoted last week.

4 cent. for granulated and 4 1/2 cent. for extra O. D. steady and unchanged.

Lard is easy and firm. 14 1/2 to 15 1/2. Oil has been very steady.

The only change being in Petroleum, which fell off 1/4 cent. on Tuesday.

Butter holds firm at last week's prices. Beans have been steady.

Free Beef is fairly active and for low grades prices are looked for.

We quote sides at 8 1/2 to 9 1/2. 9 lb. hind quarters at 9 1/2 to 9 3/4.

corns with tanks at 8 1/2 to 9 1/2. Corn and lard at 14 1/2 to 15 1/2.

The market is liberally supplied with Potatoes and dealers are now paying 40¢ a bush for the ear.

and jobbing them at 45¢ to 50¢. Beans are steady and lower. There is very little inquiry for Macaroni.

Prices are generally lower and a receipts large; buyers appear to be holding off.

Large Canned Corn, declined 2 1/2 to 3 1/2. 40; Pollock 2 1/2 lower.

Clean Cedar Shingles are easier at 8 1/2 to 9 1/2. In Drugs and Dye the only change we have to note is in Benzine, which has declined 1/2.

Paints are steady and without feature. The retail color trade is at 75 to 76 for white with no indications of higher rates.
